

Food Innovation Center

The Regional FIC is housed in Malolos, Bulacan at the Carpio Hall Grounds, Bulacan State University. The regional FIC is one of 18 FICs in the Philippines. Together with the Department of Science and Technology (DOST), the Region 3 FIC was formally launched last December 15, 2017.

FIC PROFILE

The Regional Food Innovation Center (FIC) is established in each region of the country to serve as a hub for innovations, R&D, and support services for value-adding of fresh produce and development of processed foods. It is envisioned that through the Center, innovative technologies, relevant support services, technical expertise, necessary infrastructures and facilities will be more accessible for Micro Small and Medium Enterprises (MSMEs) in the urban centers and countryside for a more effective technology application, deployment (transfer), and commercialization for sustained economic growth and productivity. (FIC Generic Operational Manual, 2016).

FIC Goals

1. To produce value-added food products through innovation.
2. To develop procedures for food processing using the FIC equipment.
3. To facilitate transfer of technology used in the development of FIC products.
4. To equip the food manufacturers and processors, SMEs, LGUs, and other sectors with relevant food processing knowledge and techniques.

VISION

A leading hub for innovations, technical support services for the food industry in Region III "transforming concepts into products".

MISSION

Commit to provide innovative technologies and relevant support services to contribute to inclusive and sustained development of the food industry in Region III.
